

EoMacca RFC Generator

Brainfuck Code for RFC 9999

This document contains Brainfuck code that, when executed by a Brainfuck interpreter, will output the complete text of RFC 9999: "A Standard for the Transmission of Ethernet Frames over IP over TCP over DNS over HTTP over TCP over IP over Ethernet (EoMacca)".

Statistics:

- Brainfuck code length: 280,411 characters
- Number of Brainfuck instructions:
 - '+' (increment): 125,492
 - '-' (decrement): 73,673
 - '.' (output): 19,704
 - '<' (move left): 20,514
 - '>' (move right): 20,514
 - '[' (loop start): 10,257
 - ']' (loop end): 10,257

To execute this code, copy it from the following pages and run it through a Brainfuck interpreter such as:

- Online: <https://copy.sh/brainfuck/>
- Python: bf (pip install bf)
- Or any other Brainfuck interpreter of your choice
